Mr. Breck on Dr. Palmer's Sermon The Rev. R. S. Breck, of New Albany Ind., addresses, through the columns the Journal, a letter to Dr. Palmer, of New Orleans, reviewing the Hartor's secession sermon. The letter of Mr. Breck is able candid and comprehensive in its views.— We can only notice briefly its bearing upon the momentons issues now pending.

The writer of the letter attempts to re-

fute Dr. Palmer's ethical position "that the subline trust providentially committed to the uate the institution of domestic slavery as no-He maintains, rather, that her tulssion is in common with the white rac with which she is connected on this conluent, and that her peculiar trust is to preve the self-government and integrity of thi country. This, he contends, meets on the part of the South all the requirements of duty to herself, to the slave, to fied, and to the world, as their duties are insisted on by Dr. Palmer. But now Mr. Breck, clearly perceiving that

the fulfillment of this duty might require the South to lose her liberty to maintain what he calls a free Government, makes qualification of vital import, namely, "that he South should not survender the institution of slavery, or submit to persistent and inexure ble aggression on account of it, even for the preservation of the Union." This admission is of course entirely latal to Mr. Breck's former position; for if slavery must be preserved, even at the expense of the Union. then the preservation of the Union cannot be for the South that "sublime trust," there being a still higher duty. As to Mr. Breck's construction of politi-

cal facts in comparison with Dr. Palmer's t is not necessary to dwell. Each of course construes the lacts to suit his own theory. The plea in abatement put in by Mr. Breek, that the recent trimmph of the anti-slavery party was dne more to section. alism than to radical functicism, is of very little if any weight ln an argument address ed to the South, as one may be as fatal to her as the other. It may, if true, make the case less hopeless, but does not make the present grievances a whit less real. I still leaves in full force all the facts adduced by Dr. Palmer to prove that the time has come when the only safety for the South is to put herself out of the power

of the North.
In justice to Mr. Breek we will say, Low ever, that the views he presents should have great force with the Northern mind, if they could find a lodgment there. It is for them to say whether the trust commit ted to the white race, in common at the North and at the South, shall be preserved: or whether the South shall be compelled to abandon the common trust and presery add, that from the total failure of the wri ter to sustain his position in ethics against Dr. Paimer's, and the small weight due to his construction of political facts, the letter, while it may please, can do nothing t change the convictions of minds, like Di l'almer's, so thoroughly aroused to the dangers which threaten the South, and so clearly percelving all the issues luvolved in the present crisis.

OUR HOOSIER FRIENDS. - There are housands of brave and true men in Indi ana who sympathize with the South, and arnestly contend for her equality in the Union. They earry on a heavy trade with benefitted by it. To show how some of them feel in regard to a separation of the States, we copy the following from the last animber of the Vevay (Ia.) News:

unmber of the Vevay (Ia.) News:
Out Interests with the South—The
danger of a dissolution of the Union thickens day by day. Should it be at last dissevered, it is uncer that we should look
about us, and see which side our interests
are. The majestic Ohio and Mississippi
are to-day free and open to our traders, and
their banks are now lined with our trading
bouts. Our products seek a Southern murket and Southern consumers. Destrey
our tributaries, and delar us our market,
and we are af once made noor. The high our trinitaries, and neter its our market, the we are at once made poor. The high prices at which the majority of our farmers sold their crops this fall was entirely owing to the buoyant prospect has South ern market. Our luterests therefore are only with the South and weber to increase. ests are we for one want to be.

FORT MOULTRIE.

This is an enclosed waterbattery, having a front on the south, or water side, of about 200 feet, and a depth of about 240 feet, it is built with sallent and resementing angles on all sides, and is admirable adapted for delines, either from the attack of a storming party, or by regular approaches. The onter and inner wells are for brick, capped with stone, and filled in with earth, making a solid wall litteen or sixteen feet in lithchess.

According to the Merenry, 170 memore constantly at work in making improvements at this fort, ditching haround the entire circumference, and receiping a glasis; closing up the postern gates in the cast and west walls, and histead, cutting sally-ports, which lead litte strong out-works on the southeast and southwest angles, in the value of the ditch on three sides with grape and canister. The nerthwest angle of the forthas also beconstrengthened by a bastionette, to sustain the weight of a heavy gun which will command the main street of the Island. The main entrunce has also been better scentred, and a trap-door two feet square, cut in the door for Ingress and egress. At this time, the height of the walls from the bottom of the dileh to the top of the parapet, is twenty feet. The little is from the bottom of the dileh to the top of the parapet, is twenty feet. A Reseal and his Victums.

Another illustration of the old adage "wed in haste—repent at icisure," is furnished in an item published by the Midwalkee Press and News. It appears that, luone of the inhud countles of Wiscon sin, att only and much loved daughter of an old man was attracted by the cashing manners, pleasing address, and lavish extravagance of a young man who was a stranger in the place, and who had casually made her own acquaintance. Against her father's removstrances and cutrearicache persisted in receiving his visits, and finally cloped with hint. His home desolate (for his wife had heen many years dead), with the agonizing thought that his daughter had thrown away herself and her happiness upon a worthless mon, the father was almost crazed. With the old love burning warmer than ever, the old man started in pursuit. The Press tells the balance of the story as follows:

"His search was successful, and the broken-hearted parent overtook the pair in the city of Chengo. Here the daughter first learned the truth lu regard to her hustmad. Sie had unlied herself to a gambier, and a mun who had been an immate of the State prison of Indiana for a high crime! More than this, he had left her but a few hours before the arrival of her father, telling her that the would soon return, and in tour hours from that time had become extrageled, during a fit of intoxication, in a drunken brawl, and was under arrest for disorderly condinet.

"Who can paint the needing between that father and daughter'—his shame and grief; her lamithation, agony, and remoree the left her away, and in a short time the ears were bearing them back to the home her deeds had served to blight. They took the La Crosse train immediately upon their arrival in this city, and ere this are at home. Can repentance and tears bring hack innocence and peace around that hearth, or testore the joyons light to her old father's eye". Let us hope so:"

The Views of General Scott.

The Views of General Scott.

According to a dispatch from Washington, General Scott has given the President an elaborate opinion in reference to the present condition of the military defenses of the country, and what should be done in view of possible contingencies. He deprecates secession, and begs his own State of Vieghia to pause and bear the fills she has rather than fly to those she knows not of. But if secession occurs, he says it will result in the formation of not two but four distinct intionallities. These are as follows. First—New York, New Empland. Pennsylvania, Michigan, Wisconsia, Iowa, and Mannesota. The second will consist of Indiana, Illinois, Odio, Western Virginia, and so along down the Bline Ridge, taking in Western Florida, Alabania, Mississippi, Louisiana, Fennessee, Arkansas, Kentucky, Missouri, and Texas. The thirdwill consist of South Carolina, theorgia, East Florida, Eastern Virginia, and, perhaps, Maryland and Dehawire. The Pacific States will constitute the fourth.

The Beneral treats the exclusion of the graingrowing States of the West from a direct communication with the Guif of Mexico as an impossibility. They will have free conrect of go down the Mississippi, and will visiat npot Penscola as an and depot. The tieneral also gives an claborate statement of the disposition of the military forces of the nation, and the condition and needs of the fortified places. dition and needs of the fortified places

The exiled Mr. Mulligan does not bear his retirement from the active scenes of Broadway and Houston street with that fortitude which was to be expected from so there a fellow. He wilted terribly when the stripes were handed bith in exchange for his glossy kerseymeres, and when shorn of his moustache he gave way to a food of tears, indeed, he sobbed most piteonsly all the while he was making his new toilet, and he finished by begging to be put he the hospital department, with the view of heing treated to light work. To the first question that was, consequently, asked him by the attending official, he was obliged to answer that he could not write, so his hopes were caded in that querter, and he was consigued to the solitude of his cell. There the suddent change from a lite of luxury and ease to the stern realities of the State prison completely unnerved him, and at midnight the wardens were summoned to than with piereing and most piteons cries His physical system had, for the time, completely broken down, and he was carried meaning to the hospital, and left there for the doctor's treatment, where, at last accounts, he still remained. South Carolina and the United States A correspondent of the Charleston Conrr, writing from Columbis, gives the following discussion, in committee, of the mail arrangements in case of secession: mail arrangements in case of secessiou:

The Postal Committee were also in seasolon in the Senate Chamber. They had not der discussion the propositions in relation to the postal service, substantially to the effect that, if the United States Government would employ these officials, the State would not interpose until some further permanent arrangement could be made, distinctly declaring, however, that the connection of the State was severed, and, therewith, the alleglance of these officials in no respect due the United States, but merely as the agents of a foreign Government, tolerated for convenience.

We learn with very deep regret that Messrs, Plume & Lamont, sugar retiners, have felt compelied to suspend payment. We understand they were so near through their difficulties that they owed but about two lundred fifty thousand deliars, and would have been carried through without a jar, if the prospect ahead had been a little more encouraging. Their entire works, comprising a valuable property, as far as we know, are entirely free from encounbrance, and therefore with a little time they will probably go on as before, so that there need be no ultimate loss to their creditors. The Position of the Cotton States. Those in the border Slave States who are ch mid hold dear, to maintain the existing Union, and, if that cannot he done, desire to listen these States on us the tall of the No. do ru Confederacy, complain bitterly of v. at they call the precipitancy of the the latter do not wait for Kentucky and Missourl to luaughrate some movemen for the preservation of their property and make a demand for the protection of the victus guaranteed to them and their elti-

And when the people are told fint the border blave States lose ten times as many negroce, and suffer ten times as many in conveniences, through the hestility of the Northern people to their matitutions, as the C ton States do, and that, for this reamon, the latter should at least bear with the few wrongs inflicted upon them, until those who suffer so much more, and who sund between them and danger, should not without off ct. And this is the invorite argument of the submissionists here:-Mr. and the Certan States from the Abo'llunized North, that they are between the latter and danger and that the "precipwill rawing from the Union does not arise from any apprehensions of danger. but is founded upon a freasonable purpose to break up the Laion, to promote which they make Lincoln's election the pretext

Then the Supreme Court will be reorganized; and Mr. TRUMBULL's recent by authority hoast that we shall have "no more Dred Scott decis-

The effect of this wariare le seen lu Delaware, now almost free, and ich In the border counties of the border Slave States. The operations of the Under ground railroad and the certainty of eacape when once the line is passed, take om 1,500 to 2,000 slaves from this State alone each year. This loss principally falls on the border countles and the tier back of them. As titls property becomes more and more insecure, holders sell

it to those living further South. How long under present auspices will it be befor that portion of this State lying on the thio river will be practically "free territoy?" Kenton county, the second most copulons in the State, had, in 1858, less han six hundred slaves; Campbell county, lirectly of posite Cincinnati, Otno, has less than two hundred; Mason county, both laves, in 1843, 4,093, now scarcely 2,000; efferson county hasn't as many slaves as were in it ten years ago. If this perpetual party strong enough to control the legisla-tion of the adjoining states, and backed by Personal Liberty Bills and such legal "aid

and comfort," the time is not far distant when the counties In Kentucky bordering on the Ohio river will have no slaves in them; and the same remark is true in regard to the border countles in Missouri, Virginia, sud Maryland. Already St. Louis, in Missouri, is Abolitionized, and Wheeling, in Virginia, is no better. If the present I nion, with no officient

ovisions for the protection of Southern rights and property, is maletuined, we can ily see where the "irrepressible liet," as far as Kentucky and the loarder ow in them will be gradually sold to the mers and planters of the Cotton States; and almost imperceptibly they will thus rid themselves of property, to hold which would require eternal vigilance and a constant conflict with lanaticism and folv and madness. The "booder" will be trans ferred to the States South of 113

And theu what? Anti-slavery will not be content to rest. The war will be ransferred to the States where slavery will hen prevail. Partlal success will have but soldened those whose prejudices and assions and partly their ignorance now linoel them to demand the extinction of slave property. The war will be transferred to the Cotton States; but in them slave labor is not only of itself indispensable, but there are no States South of them to which heir negroes can be sold. The people of Kentucky can, if they are not disposed to fight for their rights, get rid of their property without loss. Should the border line transferred to the Northern boundary of the Cotton States, there will be no retreat for slavery. Hemmed in by long xclusion from the Territories, by Fred lates on two sides, and the ocean on the thers, it will be a war of life and death, oner or later terminating in a repetition all the horrors of St. Domlago, at one fellswoop making the rich and prosperous States whose exports constitute the wealth of the nation an uninhabited and habitless

The Cotton States, justified by the fircumstances attending and preceding the riumph of Black Republicanism, and in iew of the declaration of war made on here and their property, owe it to their iwn eltizens and the world to seenre themselves now against a calamity which the ntinned possession of the Federal Gov. mment for a few years by the Black Remblican, or anti-clavery, party will make nore than possible.

[For the Louisville Contler.] The North and the jouth, The Southern people have for twenty-five wears submitted with universal moderation

Towards raising this money, the South contrinies about fifty millions of dollars, and th North only about twenty millions. Again n the disbursement of this seventy millions of dollars, shout fifty millions are lavished o the Northern States, while but twenty nillions are gradgingly spent lu the South The South thus loses every year some thir y millions of dollars; or, in other words, be South pays this thirty millions of dolare to the North for graciously allowing to hera pretended equal benefit in the inlon. While the South is thus burdened and taxed to the advantage of the North. what are the thanks and renumeration to the South? Why, the Northern States are arrayed in a most litter and hostile manner to the institutions of the South. They are waging un "Irre resaile conflet" with the South, is which, if they succeed, they will render be Southern States more subject prov ices to themselves. Although the South as in fact contributed more largely than ae North to the purchase of the Territo les and other public property belonging the United States, the North Is defiaul in her determination to exclude the South on any participation in them. If the

North and the South were two hostile na tions, it would be exceedingly offensive and lusulting to the South for the North I resume to intermeddle with her domes le ostitutions. When we consider that this bion was formed, and can be alone man ained on the idea of fraternal feeling, tot

aul kindness, benefits, and advantages how much more intolerable is this unjus and arrogant interference on the part of the Northern people? If the Norther ates will repeal their rebellions laws mind their own business, admit the South tration of the Government, and the public property, and bring their people back to which originally tormed the Govern ment, then a continuance of the union f the States would secure to all the prosperity and happiness which has made us one of the greatest nations of the

Unless this change does take place in the Northern sentlment and conduct, it were better that the two were independent nations. Unless this change speedily occurs deadly conflict between the two sections is not remote. Why then should we pos mpe the evil? Is it not heller to apply an amediate remedy for the disease; or should we fly from a danger which Is con stantly pursuing and will inevitably over-inke us? If the Union were dissolved, and a Southern Confederacy formed, the South would be able to get along very well b herself, and be in a vasily superior condition to the North. In that ease, the South would correct he North to make an equal distribution of the public property, and the rights of each citizen of the Soull would be more protected than it is at pres ent. It is the duty of every Governmen to protect its citizens against wrong and injustice, but the sitizens of the South are not protected when their property is stolen by the people of the North. When a citi zen of the North is robbed by the people

of Spaln or any other foreign country, our Government interposes and compels the foreign Government to make due restoration or ample compensation for the loss. In the event of a dissolution of the Union, this protection would alm be se-

But what would be the computative condition of the two sections' The North would lose thirty millions of ded are per year, and the South would save that sum. This would also be sufficient to support her Government. While the South is

her soil very rich and productive, the ands of the North are impoverished and exhausted, and neither repay the hasbandman nor yield sufficient susteunnee to her superabundant population. Hence, the Southern people seek after their wealth in the tillage of the soil, and the Northerner fluids his in the looms and factories, fish-ing, and navigation. But these very factoies, this navy and the fisheries of the North are supported by a very heavy tribute paid thousand dollars' worth of goods pur-

hased at the North by the people of the South, they pay about \$250 tax-a mere bonus and gratulty to the Northern manufacturer, to fill his coffers. The South also pays a heavy bonnty to Northern ships, merely for the privilege of inving her goods transported in Under all the provocations the South has submitted to the wrong and allowed her ships to transport her goods and her factories to supply her with manufac-tured articles. As the South is the only enstomer the North has or can have, what is to become of their factories when the South refuses to buy of her? Their shops Bansa of course he closed, and, as the land is moreor to support them, the people will be in a condition of starvation and want r forced to migrate from the lnhospitable conutry. What is to become of the navy of the North when the South ceases to employ her ships, and no longer buys the ods they were accustomed to transport? They will rot in the docks. And how are the Northern States to raise the money to sustain their Government, costing not less than fifty millions of dollars per The truth is, they cannot sustain themselves. A dissolution of the Union would result in great wealth and increase of population to the South, while It would wealthy and populous, had in 1840, 3.755 be most disastrous to the North in every point of view. Her thetories would be

her cities, towns and country depopulated warfare is kept up ten years longer, by a her many destroyed, and one univer sal falla averspread the man As the cotton and sugar regions would still want to buy their goods and manuta tured articles, the people of Missouri, Kentucky, Tennessee, Maryland, Virginia, and North Carotina, would supply tuem. These States would have the great advantages of a tariffin their lavor, and would reap the rich harvests now garacted by the North. The South would then grow in wealth population and all the elements of a great and happy people, while the North would decline it a corresponding ratio.

Let us, under such a regime compare instance, the condition of Chrimatl and Lonisville. Ciucinnati, one of the meanest and vilest of Abolition cities, dejonds almost entirely on the clave States for her wealth and prosperity, and, by means of that great trade, has now twice the population of Louisville, while Louisville has a much more favorable position for a large city. Let the south take that rich trade from Cinciunati and transfer it to Louisville, where it rightfully belongs, and Louisville, in the course of a few years, will have twice her population, and Cin cinnati will at once as regularly decline. In a similar decline would all the large Northern cities be, but for the rich spoil from the South, on which they batten and grow insolent. The Southern people are naturally tolerant, as is evidenced by the fact that they have thus long submitted to these grievances. The Northern people, with hostile feelings, are allowed quietly to settle among us and drive their lucrative trades and business, while many of them take advantage of this hospitality and kindness, and either run off our slaves or incite them to insurrection Northern agencles of various kinds are established among ns, and by which our people are too often delranded. A large maority of the teachers in our schools are from the North; while many of our news-papers are edited by persons from the same region of country. These editors, as general rule, are the exponents of the feelings and sentiments of this entire Northern importation, and in every conflict between the North and the South, they are aure to take the side in favor of

A MANUFACTURER Fit is possible, as the Journal says. that the Courier would suit Charleston better than it does Louisville, but we don't believe it. We are sure it would not be more acceptable to the people of south Carolina than it is to the people of Kentucky. We think the Journal would e quite as well appreciated in Boston and Mas-achusett-, as it is now in Louisville and Kentucky; but we don't believe it would be as useful to the cause lu which unintentionally we doubt, it is labores, in New Eugland as it is in a slavelding State, where its ability and influence has enabled it to embarrass, distract, and divide the friends of State Rights .-

on the side of our friends. The Journal, complaining of the Collou States, says that "the border States are treated not only with indifference, but

We, at least, prefer to err, if err we must,

with contempt." The "indifference" is shown by the tetermination of the Cotton States to go out by themselves, if the border States vill not join them. The "contempt" consists in not stagging to consult after they have started. How last the crimes of the conthate multiplying on the Jontual's ac-Showl turner

The Northern newspapers think it quite as bad for a Southern man to go to stolen from him, as it is for a Northern man to go to Charleston or Harper's Ferry incite servile insurrection and arm slaves to shoot, stab, or poison their masters. Laws to punish men like John RROWN or Kansas MONTGOMERY for doing the latter, are quoted as justifying equetments to prevent the former.

Another bright ray of sunlight in the East is the fact that Henry Ward heecher's Abolition preaching in Brook by has become so distasteful to the people that the police have to guard flood's tem-ple while his minister descrates it.—[Lou-

Had the course pursued by the Journal en followed by the South, the people of Brooklyn would have been spreading palm

tunches in Leccher's path, amid the acclamations of the anti-slaveryites. The Sentiment of the Rural Districts. A basiness correspondent, writing from

the interior of the State, says: There is but one sentlment here among There is but one sentlment here among the rural population. That is, for Kentucky to wheel luto line with her Southern states and demand all her rights under the Constitution, and submit to nothing less than a plain recognition of them upon the part of those who are the aggressors. No more temporaring, let us settle this question now and flurdly. All knoor to you for your just and manify defense of the Constitutional rights of all the people of all the States, and down with those fellows who, under the garb of "conservatism," would bind us hand and foot and deliver us over to Abolitlonism.

The Washington correspondence of the New York Tribune says the Pacific radroad bill got into a tight piace to-day, and was extricated from it by the excellent management of Mr. Sherman, who placed it in a position to be acted upon whenever the House goes into a Committee of the Whole, as it is expected to do to-morrow. There is a decided analority for the measure, including Western and Southern members, who despair of the Union, but who were on the alert to-day when this bill was up.

The rumor of Gen. Scott's resignation is entirely unfounded and never had a particle of probability to warrant it. N. U. WALKER Proprietor, THE GREAT REMEDY, GENESSEE LINIMENT!

Hon. John C. Burch has written a letter to California, giving his views and advice in the present crisis. He recommends raising aloft the independenting of California, calling on the enlightened nations to acknowledge their independence, should the dissolution of the Union be forced upon them.

Mr. Hamlin, Vice President elect, called on General Scott and held a long conference with him on the condition of the country. The General expressed the hope that all the difficulties would be overcome and quiet restored.

Mr. Hamlin also had a long interview with Gen. Cass, who still adheres to his original policy.

It is generally conceded that Wade's speech reflects more fairly and fully the position of the Republican party than any other, and is fully indorsed by them, although Southern men are bitter against him and his sentiments. Those feelings have greatly increased to-day since its publacion.

OFFICE LOUISVILLE COURSE WEDNESDAY REPRING DEC 19 We have just passed through anothe week ad there is no change for the better to notice duancial circles, owing to which fact trade restricted and prices remain depreclated teneath the surface, however, there are signs f returning confidence, and this has loosened omewhat the dead lock in the line of diecounts, but matters are exceedingly stringent, and no one as yet feels safe in looking to the sanker for acrommodation, either in the prosent or immediate future. Though there are noney market must, under the most favorable chreumstances, continue for some time after the first of January. When, however, thingget again fairly started, money will, as at the close of the panic in 1857, he very abundant. There is no change to notice in currency, and we continue to quote Illinols at 10@45 Pc discount; Wisconsin, Iowa, and Virginia 5@10 24 discount; Missourl 5@7 Pt discount; North and South Parolina and Alabana 10@20 34; discount. The notes of the Kentucky, Ohio State

Bank, New York, New England, and Louisland banks are taken at par.

The condition of financial matters in the West has not materially changed by the business of the past week. Exchange is universally scarce, and higher at all points than at this place. The bank rates here are 1 24 premium. but they are only drawing sparingly for those who have special claims on them, and a large number of persons applying are disappointed, and have to go to the brokers, who chargethen 1%@2 Pe preminnt. Sight drafts on New Or cans are held at 5@2; Pe premina. Lata warrants are in statu quo, with no demand. Dealers are willing to buy them at the follow

The general market has been dull, with but tile doing, and no change le raice, except an advance in mess pork. Flour has been in only oderate request to supply the bome tradand the sales have been limited at prices ranging from \$4 (81@\$5 50 for fine to extra family brands. At the closs, however, there was a better feeling in the market, owing to the favor able news received from the hast. There has been a good order demand for wheat from the onth, which has been filled by our dealers, and the stock here has been decreased. There have been no receipts, and we are unable to give the quotations from wagons, though choice lot-could readily be sold to dealers at 905 for red and \$1 for white; and, in fact some lots might be sold at an advance of 54 P bushel on the above quotations There has been a large or der demand for new corn, and during the weel some 30.000 bushels have been sold on private terms, for future delivery, besides lots which were sold on small orders and for feeding. The market closes steady at 45¢ for ear and 45¢ for shelled, with small sales of shelled at 54¢, sach s included, and delivered at the depot ready for shipping. The market for outs has been dull

with nothing doing except the alling of a few small orders for feeding at 30@33; in bulk, and 35; sucks heinded. There is no rhange to note in rye or barley. Whisky has been steady and prices have advanced, the market closing at 14@14%?. The grocery market has bren quiet daring the entire week, and the sales of sugar have been small for home consumption. There has been no change in prices, the market closing steady at 6% @7% for fair to extra choice New Orienns. Molasses during the first part of the week was dull, and prices declined fully 24 on last week's quotations, but later news of a

advance in New Orleans caused a firm ferling in the market, and a tair amount was sold. The quotations at the close were 202 19; for choice new plantation. There has been a small demand during the week, and a decline of fully %¢ has been established, the market closing nlet at 14% to 15¢ for prime Rio At the rommencement of the present week the provision market was quiet, with but a small demand for mess park at \$15, but inter favorable news was received from New the leans, quoting the market there bare, with an active demand, and prices advancing. These caused a firmer feeling in the market lare, and

on Monday an advance of 50? We bill was cellal-lished, with a good demand at the advanced price. To-day some 500 libbs were sold at \$15. 50, but at the close of the market most of th packers were boiding at \$16, but a few iots can yet be purchased at \$15 50, cash. There has been a fair order demand for bacton, and priremain the same as last week, with cales at a for shoulders, 104 for rib, and 124 for clear sides. The market for green and buik meat has been at a stand still during the past week, and we have been unable to hear of a sing e transaction. There are no buyers in the man ket, and packers are not making any offers.
In this state of case it is impossible for us to give any quotations There has been nothing doing in lard, and it is hard to give the acen

There is no change to note in the market 6: hogs. The receipts have been light, and noth-ing has been doing, with the exception of the sale of a less hundred head at \$5.25 net, cash. at which price several thousand head could readily have been sold. As we have before stated this is \$1 \mathbb{P} head lower than they were selling fast year, while the number packed wid fall greatly short of that of fact year. At the commencement of the present season persons were generally of the opinion that pricewould rule higher than last season, and the consequence was that they were all anxious to purchase hogs in the country at \$5 gross, and a large number of contracts were made at that price, and had it not been for the french. crisie, which has been threatening the country for some time, prices would have been higher,

with an active market.

The packing season is fast diaming to a close, and a number of the houses now circuit. losed, while others are expecting to fluish in less than a week. The number killed up to this evening is 179,942 lead, with not more than 20,000 head yet to arrive, which will make the killing around the fails this senson fall little short of 200,000 hood, which will be a fall-ing off, as compured with last year, of 23,000 head, and the consequence is that less pork and bacon will be packed. We all remember that this season the entire stock of aid pork and bacon was cuttrely exhausted about the com-mencement of the singuistring season, while last season a large amount of the old stock was left over, so that we see that the amount made this year will be very small with a bare market, while last year a large amount of the hog pro duct was packed with a full market. Owing to the low price offered by packers, a number offarmers having hogs left are now determined not to sell, but to have their hogs packed, pre-ferring to take the chances in holding bacon rather than sell their hogs at the present

Pluancial Matters Abroad.

The New York Confer and Enquirer of The New York Continer and Enquirer of yesterday says:

The money market continues stringent, Call loans are rather cast to be obtained on an doubted collistereds at 162 Fey, but this results from the lack of condeene and the desired from the lack of condeene and the renor held money in hand ready to have an an among gency than from any improvement. In the discount market the pressure still continues to be severe. First class paper goes at 156 Hs per and little, if any, will sell at a lower rate. Some few houses have cashed their own brills at 12, but in the open market is is the lowest ratice hear of. For grades of paper below the first class the market be reviewed, and the first class the market between ratices vary from 186 Ms per irregular, and the first hand the first class the market for the rescensive of the seller.

visions and Hogs:

Provisions show to day some of the Irregularities which have been common to them during the week and the season, and exhibit the fact that in times like the present the market cannot be calculated on ahead with any degree of certainty. Mess Pork has moved from packers' hands quite freely, so junch so that there is a marked distinction made now in favor of those lost which have been longest packed, and consequently most suitable for the South err markets. There were sales at 300 labis on the spot at \$14.50, \$40.50 bills, deliverable next week, at \$14. These fourse exhibit a decline from yesterday's quotations, but they are not assemted to by the trade generally, as some are holding still at \$14.75\$, \$15. Lard was in pretty good request, and sold to the extent of \$251 lines is \$1.50\$, \$20. The ruling figure for prime is

Zatest by Telegraph. LAST NIGHT'S DISPATCHES.

XXXVITH CONGRESS-SECOND SESSION WASHINGTON, Dec. 19.—SENATE.—Mr. counts made his appearance in the Senate.
Mr. Clark moved to take up the resolutions of inquiry offered by him relative to her Forts at Charleston.

Mr. Green suggested that the Senator from Oregon, who was not present, wished amend the resolution. Mr. Clark withdrew his motion.

Mr. Stidell said that a disputch of the Associated Press, from New Orleans, of December 7th, said that Scuator Slidell, i a speech, charged President Buchar with Imbecility and being the author the present crisis. He said there was the present crisis. He said there was no klad of truth in such a dispatch—to never intended anything of the kind, and never left such a sentiment. Who sent such a dispatch? Was it the reporter of the Associated Press in the golferies. If no explanation was offered, he should move to-morrow his expulsion from the gallery. He charged the Associated Press with sending dispatches from the South intended to do harm. This dispatch was a base labrication!

Mr. Gwin said that his name had been associated with that of the Senator from Louisiana, as using bord words to the President, and advising him to resign. There was not a word of truth in such a story.

The bill to carry out the existing treaty

The bill to earry out the existing treaty with Mexico was then taken up, but war postponed to allow Mr. Hunter to report a bill.

Mr. Hunter, from the Committee on

hill.

Mr. Hunter, from the Committee on Finances, reported the House bill making an appropriation for the payment of the valid and other pensions for the year endling June, 1862. Also the bill making appropriations for the support of the military academy. Both bills were passed. The consideration of the bill recently out the treaty with Mexico was resumed. Mr. Johnson's amendments to the Constitution were taken up.

Mr. Johnson, of Tennessee, testiment and said when he gave way yesterday bewas spenking of Northera laws conflicting with the Fugitive Slave Law. He proceeded to argue that such has were interest in ional and millifying. The Government should execute its laws in the States, and the laws of the United States should not be considered at variance with them. He argued that a State could not go out of the Union of its own volition. He read extracts from Madison to show that such as not necessary to give the tow enunent power to enforce its laws in the State, and that it was not necessary to give the tow enunent power to enforce its laws in the State, and the state, as It had it by the law of the nation He (Johnson) claimed the power to enforce the laws upon matters expressly delegated by the States to the General too enunent. If any State puts itself in opposition to this power it is aggression and rebellion. If the Government failed to perform its duty in this respect, it is not an end. He called attention to Jackson and Webster's views on this subject. The tower ment was called into existence by all the ster's views on this subject. The ti

Mr. Johnson then referred to the lay passed in Congress in 1755 taxing distil-tes. A part of the people of Pennsylva resisted. Congress then cafored the lay but there was no talk of coercion. The but there was no talk of coercion. The is no difference between that and the 1 sistance of the whole people of a Stat fle read a proclamation of Washington t show that he considered that the law must be enforced, and that the Union will repealable. Gen. Washington sent lettly men to put down rebellion. He enforce the laws. Suppose the whole people. Pennsylvania had rebelled. Would it betwee heave beautiful tool to have heave beautiful tool to law.

enforced the laws as though a part had re enforce the daws as thought a part had re-belled?

Mr. Johnson paid a high enlogy to dack-son. He was President in 1832, when a re-bellion broke out. He said that Jackson took the same views of rebellion that Washington did, and it was put down, and the Government went on. Now, how is it? The duties are the same, but the cons-quences belong to food. He intended to discharge his dniy. Have we not the paw er to enforce the laws in South Carolina as well as in Vermont? He agued that if South Carolina relused to per-nit the Federal Courts to sit, or the rat-ging of mails, or the collection of twing of mails, or the collection revenue, the Government has a right to force the laws. If South Carolina secoand indertakes to drive the lowernment from its property, it is levying war, and that is treason, nuthingless. Washington, that is treason, nothingless. Washington Jefferson, and Madison deaded the right of secession, yet we are now told that a State can go not of the Union, regardless of the

can go and of the Union, regardless of the consequences to the other States.

House,—Mr. Washburn, of Hilmois, or fered a resolution, the Senate concurring that when they adjourn Iosmorrow, if to matil the 7th of January

Mr. Etherldge moved to lay it on the table. It was tabled by three majority.

The consideration of the Territorial business was bostbound. iness was postponed.

House went into Committee on the Deliciency Appropriation bill.

Mr Sherman offered an amendment speropriating \$6,000,000 to carry out the law for the suppression of the African Slave

appropriation for the reason that Congris-ought to make other provision than now exists for taking core of recaptured Afri-cans in Liberia, Instead of appropriating about one-sixteenth of the yearly revenue of the Government for that purpose.

Mr. Sherman said the question was not asto the propriety of the law, but as to its execution. The Secretary of the Interfor has previously asked for this appropriation. Mr. Sherman soused a letter to be read from the Secretary

gerjor has previously asked for this appropriation. Mr. Sherman soused a letter to be read from the Secretary of the American Colonization Society, stating that the Government of Lionan has in charge nearly 3,800 recaptmed Africans, and has only received \$25,000, and unless a speedy provision be made in Liberia, he would be compelled to process against any more being landed on that roast. Mr. Sherman said that, whatever may be the delect in this law, this appropriation is required to accet the contract. Mr. Jones remarked that, paying 1 liberia liberally for recaptured Africans hathe effect of increasing the number, but the more captured, the more money the Government gets therefor. The Secretary of the Colonization Society does not care how many are recuptured.

Mr. Maynard soid the slave Irade was not carried on between the constitution the constitution

States. The trade was between Africa and one or two provinces of Spain. England, by her treaty with Spain, can, it she choose close those ports to morrow, or as early as her Inclinations prompt. England also has treatles extended all along the African coast, closing that part of the world to the slave trade; but by her ronnivance, not to say participation, this traffels be permitted, which the United State by treaty is made from time to time to play polled on the seas to capture slaves at an expense of nearly a million of dolianper year. This is an attitude in which the tovernment ought not to be placed, and Congress chould prevent it.

Mr. Frice Would refuse to pay any those appropriations until there was a cystem

Mr. Frice would refuse to pay any those appropriations until there was a cystem providing for the maintenance of recaptured Africans. The Republic of Liberian being nearly swamped by these shirtiess Cumbbals. He was for giving Liberia an opportunity of illustrating her capacity for self-government. He approved of the plan of taking recaptared Africans into quasi apprenticeship.

Mr. Sherman explained The appropriation asked for was to carry out existing laws and contracts. It was not computery on Ilberia to take care of recaptured Africans. If she does not wish to be so bardened she can refuse such Africans, and the President can make a contract with any other party. From Pike's Peak.

Mr. Crawford said there was not a word in the act of 1819 which could be tortured into a construction for the support and maint nance of recaptured Africans for a year thereafter. Mr. Clemens consented that the law would hear no such construction.

Mr. Cochrane resumed and maintained that the laws of humanity required such construction, and that Congress at the last session thus construct to feed and clothe them in Liberia. He opposed the introduction of the British upprentice system as more outrageous and objectionable than any other. Nothing should be done to horease the number of Africans in this country, as free, apprentices or slaves; fet as do nothing to increase this species of population, which is calentated to bring about an irrrepressible conflict between the races which has already given so much trouble. He would willingly vote for the appropriation, and nore, if found necessary, by principles of humanity.

Mr. Reagan did not think it right to put the suppropriation, and at they should be delivered up to the agent of the Government, from which the vossels sait, and they should be compelled toneountain them.

Mr. Bingham opposed the amendment of Mr. Reagan.

Mr. Kunkel maintained it was manifest that the present laws are defective. They have not produced the suppression of the slave trade by the laws passed the last session, and the birden on the Government increased.

Mr. Reagan's amendment was rejected, and the original one appropriating 200,000 was adopted.
